

MOH WILDAN HAIKHAL

Palembang, ID | [+6285172051808](tel:+6285172051808) | wildanjrbusiness@gmail.com |

EDUCATION

POLITEKNIK NEGERI SRIWIJAYA INDONESIA

Bachelor of Informatics Management

Majoring in Informatics Management;

Relevant Coursework: Algorithms; Data Structures; Object-Oriented Programming; Database;

Palembang, ID

2021 - 2025

EXPERIENCE

MORAVIA

Research Scientist - Full Time (remote)

Alnwick, UK

Mar 2024 - Feb 2025

- Collaborating with a diverse team to pioneer innovative Machine Translation and Natural Language Processing (NLP) solutions, driving product excellence and customer satisfaction.

Machine Learning - Full Time (remote)

Nov 2023 - Mar 2024

- Leveraging a diverse toolkit of machine learning frameworks and tools to build robust and efficient models, ensuring high performance and reliability in production environments.

Skills: Natural Language Processing (NLP) · Machine Learning · Generative AI

Sakitapa

Data Scientist – Self Employed(remote)

Jakarta, ID

Nov 2024 - Feb 2025

- Built and fine-tuned ML models to analyze patient data and provide early health risk predictions.

Skills: Machine Learning · Deep Learning

Wizard - Tech

Machine Learning Engineer – Part Time (remote)

Birmingham, UK

Jan 2024 - Feb 2025

- Led the development of custom facial emotion recognition models using Convolutional Neural Networks (CNNs).
- Evaluating and fine-tuning machine learning models through rigorous experimentation and validation processes, ensuring robustness, accuracy, and adaptability to diverse use cases.

Skills: Machine Learning · Computer Vision · Deep Learning

PT PLN (Persero)

Energy Transaction – Internship (on site)

Palembang, ID

Feb 2024 - May 2024

- Assisted the Energy Transaction Division in managing customer billing data and ensuring transaction accuracy.
- Responsibilities included inputting customer billing information into the internal system, validating transaction records, and performing data verification to ensure accuracy and compliance with company standards.

Skills: Data Entry, Data Analysis

CYBORG IT CENTER

Instructor Machine Learning - Full Time (on site)

Palembang, ID

May 2023 - Nov 2023

- Taught more than 20 students with diverse backgrounds in Machine Learning, AI, and Deep Learning.
- Assisted students at various proficiency levels, ranging from beginners to advanced learners.
- Emphasized a personalized approach to ensure in-depth understanding and address each student's unique challenges.

Skills: Artificial Intelligence (AI), Computer Vision, Natural Language Processing (NLP) · Machine Learning · Python (Programming Language)

Gaotek Inc

Software Engineer - Internship (remote)

New York, US

Apr 2023 - Jun 2023

- Implemented a cloud-integrated workflow using Google Cloud Storage and Cloud Functions to automatically clean, analyze, and store results, streamlining the data pipeline and reducing processing time by over 50%.

Skills: Python (Programming Language) · Flask**Indonesia Bussiness Links**

Web Developer – Internship (remote)

Palembang , ID

Mar 2023 - May 2023

- Improved website performance and design by fixing layout issues, enhancing user interface elements, and optimizing front-end code for better responsiveness..

Skills: PHP · WordPress · cPanel**The Stealth Company**

Software Engineer - Full Time (remote)

Singapore , SG

Oct 2022 - Dec 2022

- Worked on scalable web crawlers and data enrichment pipelines to extract, process, and link B2B data from diverse online sources.

Skills: Python (Programming Language) · Google Cloud Platform (GCP) ·**ABOUT ME**

Hello, my name is Moh Wildan Haikhal. AI Engineer and Research Lead with strong expertise in Machine Learning, Artificial Intelligence, and NLP-based systems. Experienced in designing and delivering end-to-end AI solutions from problem formulation, data strategy, model development, evaluation, to deployment in production environments.

I have led AI research and engineering initiatives focused on transformer-based architectures, multilingual NLP systems, and AI-driven automation. My work emphasizes scalability, model reliability, performance optimization, and business impact alignment.

With a strong foundation in software engineering, I bridge the gap between research and production by building robust APIs, scalable backend systems, and deployable AI pipelines. I am comfortable working in cross-functional teams and driving technical direction for AI initiatives.

CORE COMPETENCIES

- AI System Architecture & Solution Design
- End-to-End Machine Learning Pipeline
- NLP & Transformer-Based Models
- Generative AI & LLM Integration
- AI Automation & Workflow Orchestration
- Model Optimization & Performance Tuning
- Technical Leadership & Mentoring
- Cross-Functional Collaboration

TECHNICAL SKILLS

Programming Languages: Proficient in Python & Javascript, Advanced in PHP, SQL

Machine Learning & AI: Machine Learning & Deep Learning, Natural Language Processing (NLP). Transformer Architectures, Generative AI & LLM based systems, Model Fine-tuning & Transfer Learning, Model Evaluation, Error Analysis & Model Validation, Data Preprocessing & Feature Engineering.

Framework & Libraries: PyTorch, TensorFlow, Scikit-learn, Hugging Face, OpenCV, React.js, Laravel, RestAPI, FastAPI/flask, Node.js, Next.js

Developer Tools: Git & Github, Docker, MongoDB, Mysql, Firebase, Google Cloud Platform (GCP), Amazon Web Services (AWS), n8n, REST API development.

CORE COMPETENCIES

- Led AI Research initiatives and guided engineering teams in model development and experimentation.
- Defined technical roadmap for AI projects aligned with organizational objectives.
- Conducted model reviews, experiment validation, and performance benchmarking.
- Translated business requirements into scalable AI solutions.
